

Project PrIDE Update

PrEP · Implementation · Data to Care · Evaluation

Marlene McNeese

Bureau of HIV/STD and Viral Hepatitis Prevention

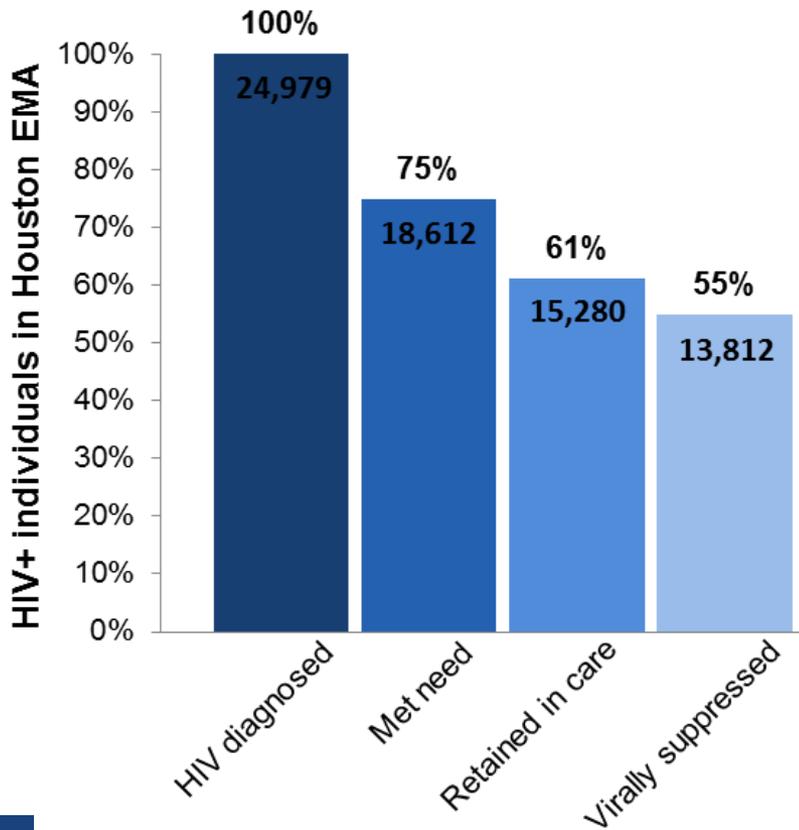

Houston Health Department

From Research to the Real World: Sharing Science Symposium

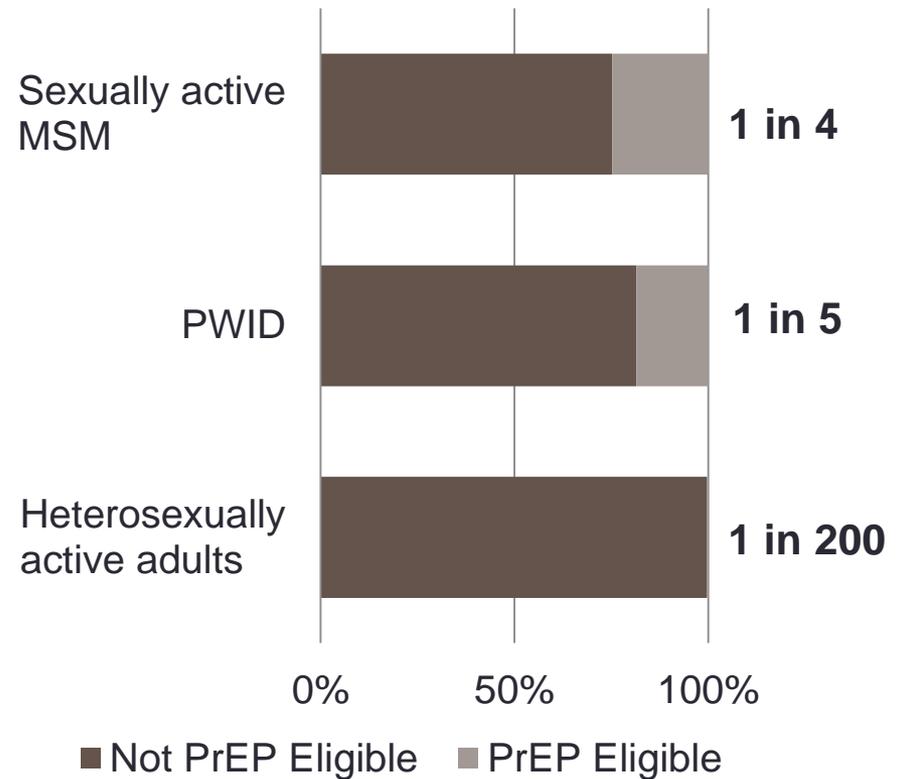

January 31, 2017

Why We Did This Study

HIV in Houston (2014) ¹

PrEP Eligible in U.S. ²

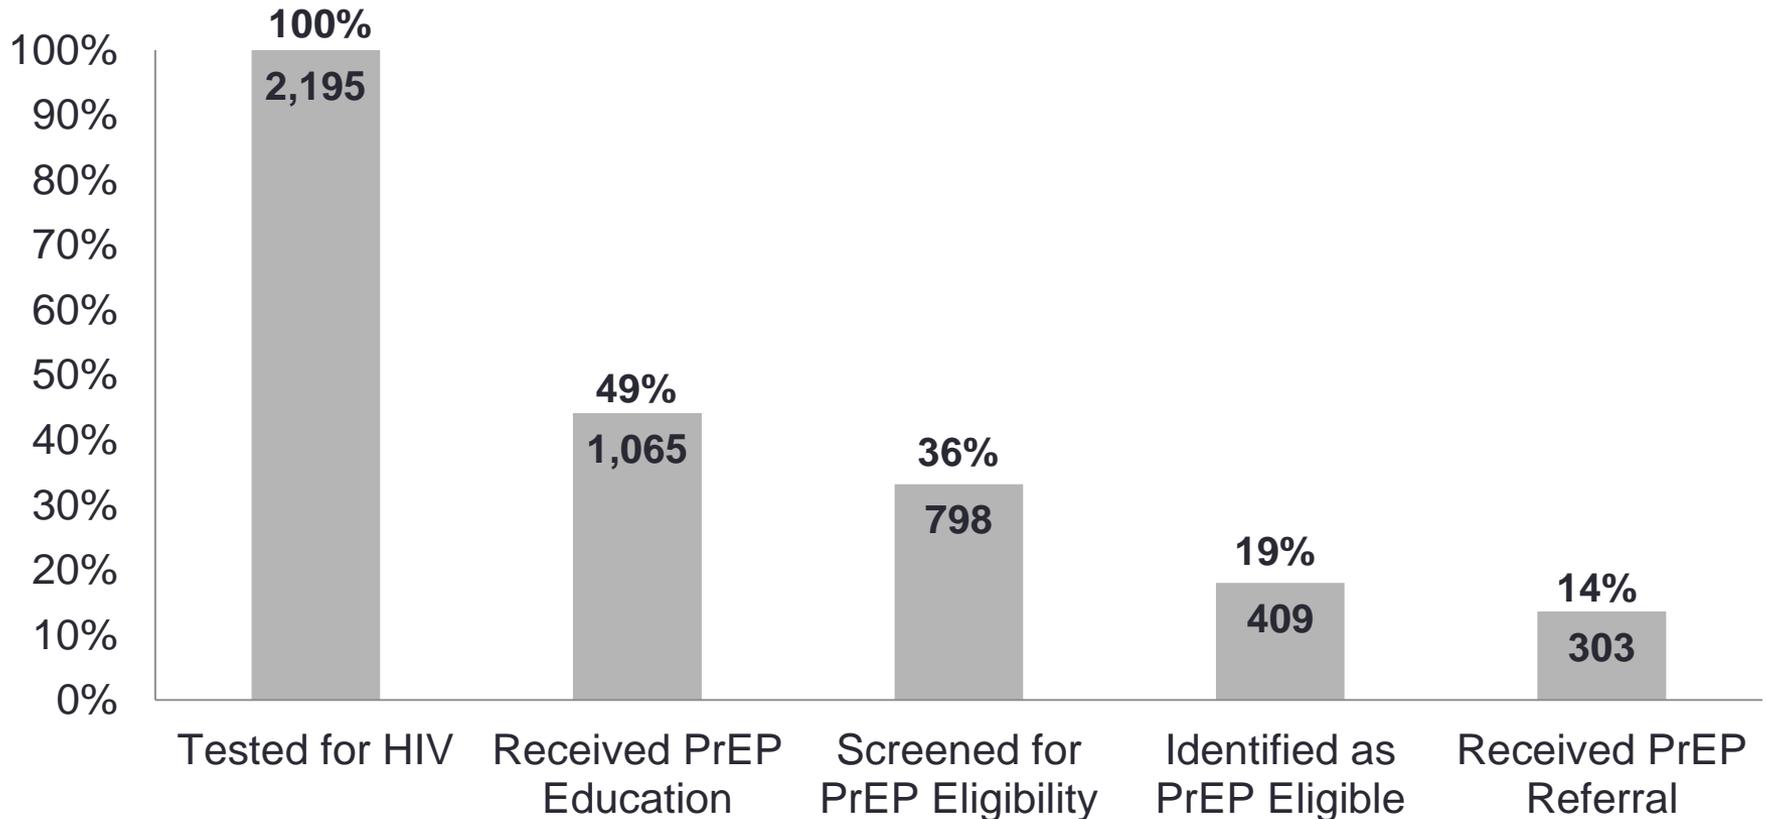

What We Did

- Project PrIDE (PS 15-1506): Health department support demonstration projects
 - Category 1: PrEP
 - Category 2: Data-to-Care (D2C)
- Three-year \$4.5 million grant (FY15-18)
- Target: MSM, TG, and persons of color
- Unable to use CDC funds to pay for medication

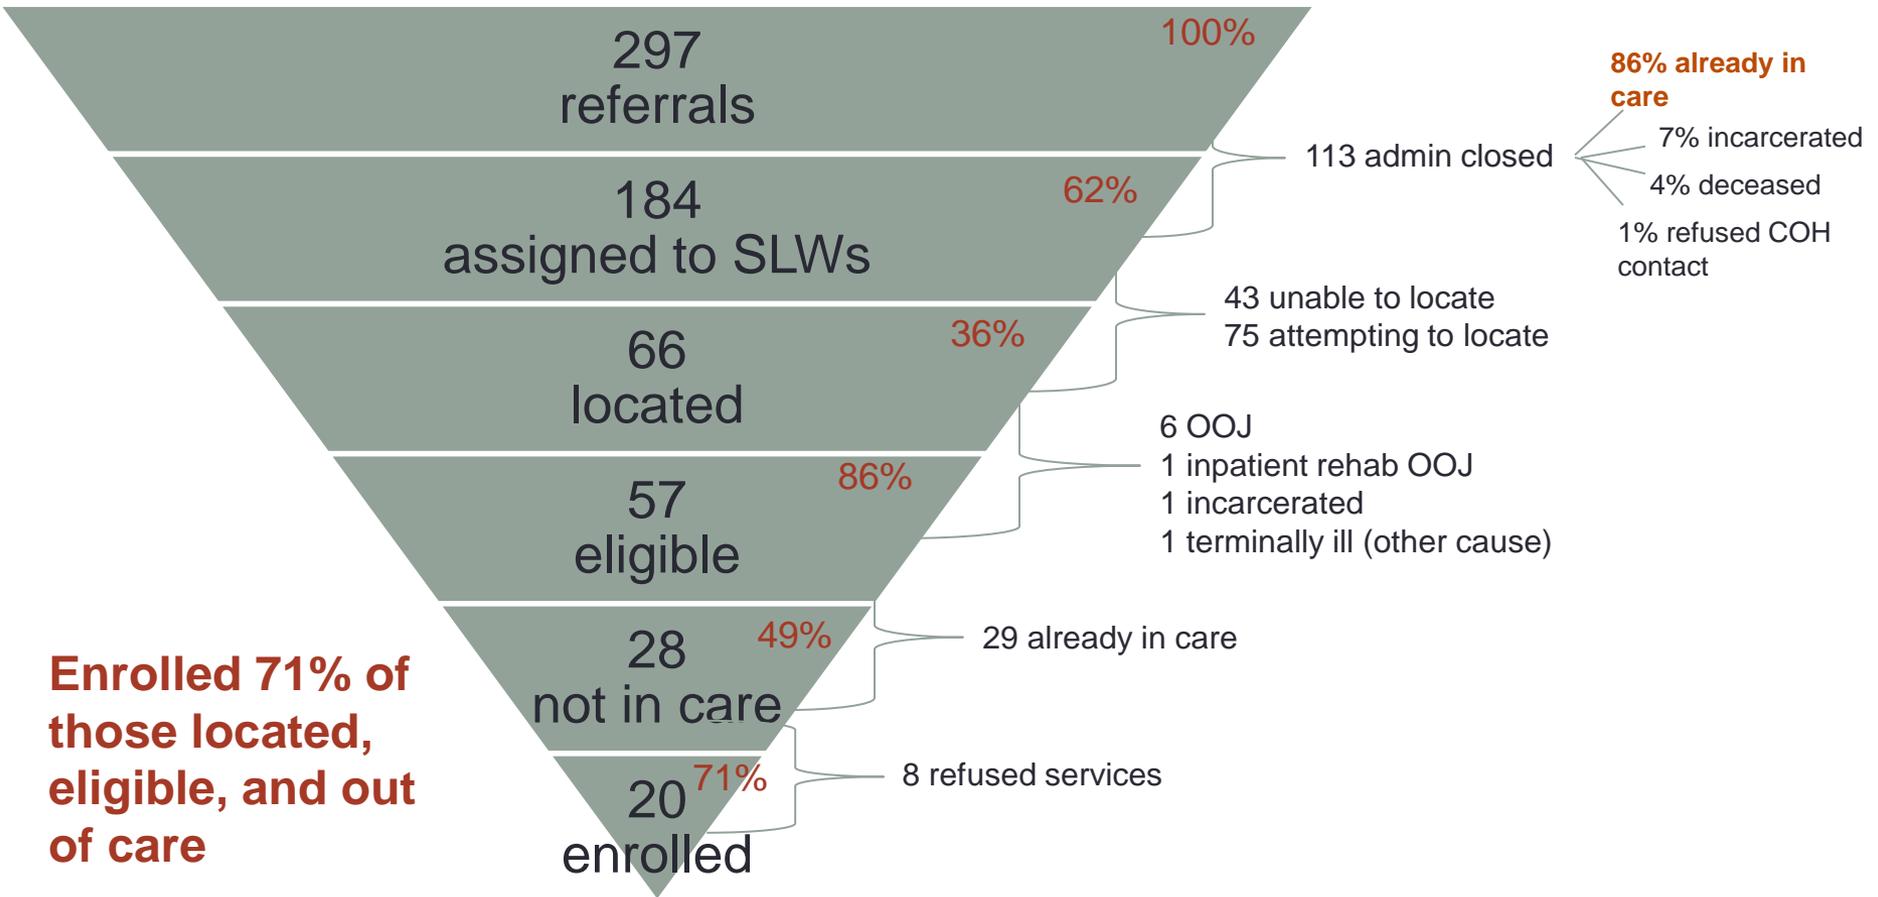

What We Found: PrEP Cascade

September - December 2016

HIV Prevention Contractors

What We Found: Data-to-Care

What Our Results Mean and Why this Matters

PrEP

- Improvements needed to ensure everyone who gets tested for HIV also receives PrEP education
- Identify training opportunities, data collection methods, & social marketing campaigns to increase PrEP awareness

Data to Care

- More people are in care than lab data tells us. Utilizing existing data systems, able to conserve resources by administratively closing 35% of total referrals as “already in care”.
- Re-linkage is resource-intensive: 36% located thus far
 - New service linkage data system tracks all efforts to locate
